- GitHub
- Catalyst
- Visual Studio
- Excel
- Word office, Outlook, Microsoft 360 suite

Interpersonal

I have been in many work environments and have been able to provide people a well-rounded employee from working alone and taking responsibility for individual tasks to create a plan for multiple workers to accomplish the same goal. I have been both part of the team when I was a winter seasonal laborer for the city of Kawartha Lakes learning from those who were more experienced, to working as the leader of facilities in the Sports field in Lindsay managing a maintenance schedule for the facility and creating a safe and efficient work environment for the students I oversaw. I am well adapted to any role I have been placed in and strive to work and create a work environment in which everyone wants to work in. In a job I am experienced I love to share my skills and knowledge and where I may need assistance, I am more than willing to ask and learn from those around me.
